

We offer cost-effective Excel and Visual Basic Programming solutions for Small Businesses.

Our aim is to give you quick and easy automation, leaving you more time to spend on more important jobs.

Do you have multiple spreadsheets that don't talk to each other?

Are you copying information between spreadsheets?

Does it take longer than it should to get the information you need?

How we can help

Functionality

We can fix and update your current spreadsheets, improving functionality as required, using Excel's VBA programming language.

Automation

- ⇒ Automate links between spreadsheets
- ⇒ Automate links to other systems.

Bespoke Programming Solutions

Sometimes Excel doesn't quite fit the bill. And in these cases we can create small, tailored computer programs to achieve the results you need. (And they won't cost the earth).

Our Background

Based in Teesside in the North East, our background is in Small Business and we have worked in several industry sectors, including:

Professional software development - creating many useful utilities as well as **commercial products used by thousands of companies.**

Food Importing - where **efficient processes** were key and **Excel automation** played a very important role.
